

General Areas of Responsibility

In September 2018 a General Areas of Responsibility document was sent out to school Principals to review and provide feedback on. This document collated all of the information we had gathered through interviewing Teacher Aides across the country covering all areas of work done by people in their role as teacher aides.

The intention of this is to ensure we cover all of the work that is being done, not that teacher aides have to be doing all of this work in order to be considered teacher aides. NZSTA, the Ministry of Education and NZEI Te Riu Roa asked for Principals, Deputy Principals or SENCOs that work closely with Teacher Aides to provide feedback in order to ensure all of the work was captured.

This data will now be used during the comparator and work assessment phases.
